Referendum Petition

No-one in Britain under the age of 53 has ever had a chance to give their opinion on our country's position within the European Union (EU).

Some people believe that we should leave the EU altogether, and that we should negotiate trading and other agreements with Europe as we would with any other country or continent. Others believe that our best interests would be served by fully committing to the EU, which would mean greater surrender of sovereignty to Brussels, and eventual adoption of the single currency - the Euro.

Currently, we have one foot in the EU, and one foot outside it. This is detrimental to our interests, and to the interests of the EU, both politically and economically, and we need to take a decision as to where our future as a nation lies. This decision must be taken by the people, and our politicians must abide by it. When that decision is made, then we will look to our politicians to show strong and decisive leadership, and to take our country on the course we choose.

We believe that the time to make our decision is NOW!

We the undersigned call upon the Prime Minister and his Government to enable an Act of Parliament, to allow the British people a referendum on the United Kingdom's continued membership of the European Union.
